Wolfgang Rottmann has been working as a product photographer for over 25 years, working for regional clients as well as for large agencies up to global players. As a coach he has successfully conducted many trainings and presentations and inspired many people for photography.

Abbildung 3.1: Aufheller im Einsatz

3.1 HAUPTLICHT UND AUFHELLER

Was Licht ist, wie auch Schatten. Eigentlich ist die Produktfotografie ein Ansatz ganz einfach zu verstehen. Wie entstehen meist ein Tageslicht, das das Hauptlicht darstellt.

Um aber das Produkt und die Charakteristiken gleichmäßig ausleuchten, bedarf es meistens auch eines Aufhellers in den Schattenbereichen. Dieser Aufheller kann als Reflektor in Form einer reflektierenden Fläche oder ein Gegenlicht in Form einer Scheibe aus Glas, Plexiglas oder auch einfach ein weißes Tuch sein.

Das Schöne daran ist, dass es sich um ein sehr einfaches und kostengünstiges Mittel handelt, um das Licht zu steuern. Es ist ein sehr praktisches Werkzeug, um das Licht zu steuern und das Produkt zu beleuchten. Es ist ein sehr einfaches und kostengünstiges Mittel, um das Licht zu steuern und das Produkt zu beleuchten.

DIE MEISTEN PRODUKT-FOTOS ENTSTEHEN MIT EINEM HAUPTLICHT UND AUFHELLER IN DEN SCHATTENBEREICHEN.

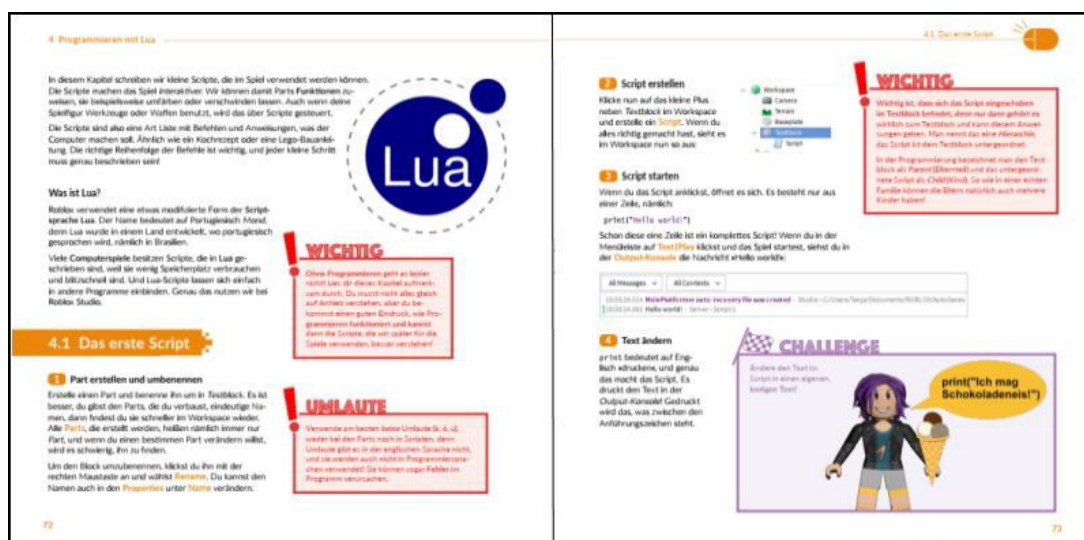

CREATE YOUR OWN GAMES WITH ROBLOX - SO EASY!

- CREATE YOUR OWN ROBLOX GAMES - WITHOUT ANY PREVIOUS KNOWLEDGE
- EASY TO PLAY FROM THE FIRST STEPS TO CLEVER TRICKS
