**Alexander Altendorfer** discovered his passion for LEGO, photography and video production at an early age. He produced his first stop-motion film at the age of 13 and has been blogging on [www.stopmotiontutorials.com](http://www.stopmotiontutorials.com) ever since. After studying media technology and design, he now works independently in his advertising agency, where the stop-motion technique continues to be used.

### 3.1 Ideen finden

Abbildung 3.1: Screenshot von Rymdreglage – 8-bit trip

Dieser Stop-Motion-Film vom YouTube User »Rymdreglage« ist deshalb so besonders, weil er ganz ohne klassische LEGO-Figuren auskommt. Säulen und Wellen aus LEGO bauen sich auf und bewegen sich im Takt zur Musik. Durch die ruhigen Kamerabewegungen wirkt das Video sehr dynamisch. Um so einen Film realisieren zu können, brauchen Sie eine große LEGO-Platte, sehr viele LEGO-Steine und noch viel mehr Geduld.

<https://youtu.be/igsWFFuZYI>

#### Idee

Visualisieren Sie Ihren Lieblingssong mit sich im Takt bewegenden LEGO-Steinen. Lassen Sie die Steine einzelne Worte aus dem Songtext bilden. Oder drehen Sie ein Musikvideo, das die Stimmung des Liedes widerspiegelt.

### 3.2 Inspirieren lassen

#### LEGO – The Force Unleashed

Abbildung 3.2: Screenshot von LEGO – The Force Unleashed

YouTube User »Fancy Paints« wollte laut Videobeschreibung das »coolste Laserschwert Duell« knirschen. Für die Spezialeffekte wie die Laserschwerter und die Blaster benutzte er das Programm Adobe Photoshop.

Ein derartiges Video ist mit einem sehr hohen Zeitaufwand verbunden, da die Bilder nachher am Computer Bild für Bild nachbearbeitet werden müssen und die hochkomplexen Kampfszenen sehr schwierig zu animieren sind.

<http://youtu.be/jjph6an-JIQ>

#### Idee

Lassen Sie Ihre LEGO-Figuren doch auch mit den Fäusten, in einem klassischen Westenduell oder mit Ritterrüstung und Schwert gegeneinander antreten. Oder filmen Sie eine andere Art von Wettkampf, beispielsweise ein Fußballturnier.
