

NEW RELEASES IN JANUARY 2026

3D printing with Bambu Lab

The practical guide for all models in the Bambu Lab A1, A1 mini, X1, P1, P2, and H2 series

ESP32 Microcontroller

Practical Introduction

3D printing with Bambu Lab

The practical guide for all models in the Bambu Lab A1, A1 mini, X1, P1, P2, and H2 series

256 pages, € 29,99 (D)

Softcover, 17 x 24 cm

ISBN: 978-3-7475-1120-6

In full color

- Comprehensive practical introduction to 3D printing with Bambu Lab
- Introduction to Bambu Studio, filaments, and multicolor printing, including purchasing advice for the various printer models
- Suitable for all Bambu Lab printers (A1, X1, P1, P2, and H2 series)

About the authors:

Stephan Knaus has been passionately involved in 3D printing since 2015 and has first-hand knowledge of the typical challenges of printing with resin. As the operator of the drucktipps3d.de community, he writes test reports and tutorials and offers expert support in the forum on a daily basis.

ESP32 Microcontroller

Practical Introduction

320 pages, € 33 (D)

Softcover, 17 x 24 cm

ISBN: 978-3-7475-1054-4

In full color

- Introduction to the hardware of the ESP32 family: boards, modules, and chips
- Programming with C++ and MicroPython and introduction to the Arduino IDE, ESP-IDF, Visual Studio Code, and Thonny development environments
- Practical examples such as weather station, precision voltmeter, temperature measurement with Pt100 sensor, sensor network, and DIY ESP32 board

About the author:

Thomas Brühlmann works as a consultant and has many years of experience in hardware and software development. He also implements projects with open source hardware, gives lectures, and conducts workshops. In his blog at arduino-praxis.ch, he follows the latest developments in the Arduino project and publishes projects, applications, tips, and tricks.

NEW RELEASES IN February 2026

Learn to program with Python—It's that easy!

For children and adults — ages 10 and up

Digital notes with Goodnotes

Clearly structured | creatively designed | efficiently organized

Your smart home with Home Assistant

The quick start guide: From getting started to custom home automation

Information security and cybersecurity

A strategic practical guide for modern CISOs and security decision-makers

Drawing people and emotions step by step

The extensive library with 200 designs

Learn to program with Python—It's that easy!

For children and adults —ages 10 and up

- All the basics of Python clearly explained with illustrations
- Very easy — from your first simple programs to clever tricks
- Have fun programming with simple step-by-step instructions and exciting challenges

208 pages, € 24,99 (GER)

Softcover, 22 x 22 cm

ISBN: 978-3-7475-1190-9

in full color, 2nd ed.

About the author:

Michael Weigend has been a teacher for more than 30 years and currently lectures on python programming at the University of Münster. He is active in several national and international communities dedicated to the use of computers in education, including Constructionism, IFIP TC3 (Computers in Education), and the Informatik-Biber competition.

Digital notes with Goodnotes

Clearly structured | creatively designed | efficiently organized

320 pages, € 26,00 (GER)

Softcover, 17 x 24 cm

ISBN: 978-3-7475-1069-8

One chapter in full color, 2nd ed.

- All the app's features explained step by step
- Numerous practical tips for productive everyday use
- Inspiration for designing your notes creatively and visually with sketchnotes, digital stickers, and more

About the author:

Andrea Rawanschad is an expert in self-organization. As the owner of LIKE PAPER Andrea Rawanschad GmbH, she has already helped many people make the switch to digital note-taking with Goodnotes.

Your smart home with Home Assistant

The quick start guide: From getting started to custom home automation

368 pages, € 29,99 (GER)

Softcover, 17 x 24 cm

ISBN: 978-3-7475-1153-4

in full color, 2nd ed.

- Getting started: From installation and configuration to adding new smart home devices
- Automations and smart scripts using scenes, blueprints, and YAML code
- A wealth of essential settings and practical tips for the perfect smart home

About the author:

Oliver Kluth has been working with Home Assistant on a daily basis since 2018 and shares his experiences and tips on smarterkram.de and YouTube. As a family man, his focus is on integrating his smart home into family life as seamlessly as possible without sacrificing comfort.

Information security and cybersecurity

A strategic practical guide for modern CISOs and security decision-makers

688 pages, € 59,99 (GER)

Softcover, 17 x 24 cm

ISBN: 978-3-7475-0679-0

- Practical approaches to the strategic development of modern security programs
- Clear guidelines for CISOs on governance, risk, and compliance issues
- A comprehensive overview of current technologies, frameworks, and best practices

About the authors:

With over 20 years of experience in cybersecurity, **Marcel Küppers** combines in-depth technical expertise with extensive leadership and management experience. After earning a degree in computer science with a focus on IT security, he has held a wide variety of roles—from ethical hacker to CISO—and has successfully advised and supported companies across a range of industries and sizes.

Drawing people and emotions step by step

The extensive library with 200 designs

224 pages, € 22,00 (GER)

Hardcover, 19 x 19 cm

ISBN: 978-3-7475-1184-8

In full color

- Step-by-step drawings: Every character and every emotion is shown stroke by stroke — perfect for beginners and advanced learners
- Expression over perfection: Bringing people to life with simple means and making emotions visible
- Versatile: Ready-to-use designs for visualizations, comics, bullet journals, flipcharts, sketchnotes, presentations, personal notes, and much more.

About the author:

Holger Nils Pohl is a versatile creative professional, visual strategist, author of non-fiction, children's, and fantasy books, trainer, and autistic individual who works internationally — in short: a creative powerhouse.

NEW RELEASES IN March & April 2026

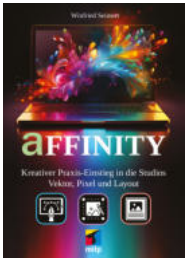

AI needs leadership

Successfully implementing AI transformation in your organization

The best AI tools

For text, images, audio, video, research, learning, and workflows. Incl. ChatGPT, Copilot, and many more

Affinity

A creative hands-on introduction to Vector, Pixel, and Layout Studios

AI needs leadership

Successfully implementing AI transformation in your organization
